CAREER OBJECTIVE

Aspiring software developer seeking an opportunity to apply my technical skills in a professional environment while learning, growing, and contributing to real-world projects.

PROFESSIONAL EXPERIENCE

Salesforce Developer Virtual Internship (SmartBridge — Salesforce — AICTE)

Intern

May 2025 – Jul 2025

- Completed hands-on training in Salesforce CRM fundamentals, Apex programming, Lightning Web Components (LWC), and Flow Automation through Trailhead-based learning modules.
- Built and customized Salesforce applications by creating objects, workflows, validation rules, and automation processes to solve real-world business use cases.
- Earned the Agentblazer Champion certification by successfully completing project-based tasks, superbadges, and practical assignments in the Salesforce ecosystem.

EDUCATION

St Joseph Engineering College

Bachelor of Engineering in Computer Science and Engineering (CGPA: 8.60)

Mangaluru, India

2023 – present

Alvas PU College

Pre-University Course in PCMB (93.83%)

Moodbidri, India

2021-2023

Don Bosco English Medium School

(73.4%)

Shirva, India

2009-2021

CERTIFICATIONS / COURSES

Learn to Program: The Fundamentals — Coursera

R Programming Fundamentals — Infosys Springboard

Advanced Data Structures & Algorithms in Java: Sorting & Searching Algorithms—Infosys Springboard

Privacy and Security in Online Social Media — NPTEL

E-Business — NPTEL

Psychology of Emotion: Theory and Applications — NPTEL

Computational Theory: Language Principle & Finite Automata Theory - Infosys Springboard

Computational Theory: Using Turing, Transducers, Complexity Classes - Infosys Springboard

Blockchain for Enterprises - Infosys Springboard

PROJECTS

Fake News AI-Detection

- Developed an AI-powered fake news detection platform to classify user-submitted text and URLs as real or fake using Natural Language Processing (NLP) and machine learning techniques.
- Built a full-stack web application with features including confidence scoring, author/source credibility analysis, detection history tracking, and a Chrome browser extension for real-time news verification.
- **Tech Stack:** React.js, Tailwind CSS, Python, FastAPI/Node.js, MongoDB, Machine Learning, NLP, Chrome Extension API.

Telecom Customer Churn Analysis and Prediction using Machine Learning

- Developed a machine learning-based churn prediction system using telecom customer data to identify at-risk customers and enable proactive retention strategies, achieving ~80% model accuracy.
- Implemented and evaluated multiple models including Logistic Regression, Random Forest, XGBoost, and LightGBM, along with customer segmentation techniques to analyze churn behavior and key influencing factors.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, Streamlit, XGBoost, LightGBM, Machine Learning, Data Visualization.

Railway System Database Management

- Designed and developed a relational railway management database to handle train schedules, passenger bookings, seat availability, cancellations, and station operations efficiently.
- Implemented advanced SQL functionalities including complex JOINS, nested queries, triggers, and integrity constraints to automate real-time seat updates and optimize reservation workflows.
- **Tech Stack:** MySQL, SQL, Database Design, ER Modeling, Schema Design, Relational Database Management System (RDBMS).

GoBlogAPI – RESTful Blog API with Microservices

- Developed a RESTful blogging platform using Go with a microservices-based architecture to support secure user authentication, blog creation, content management, and user interactions such as likes/dislikes.
- Designed modular services including Authentication, Post Management, and Reaction Service, communicating through HTTP APIs to ensure scalability, maintainability, and independent service deployment.
- **Tech Stack:** Go (Golang), REST APIs, HTTP, JWT Authentication, PostgreSQL/MongoDB, Microservices Architecture.

Personal AI Chatbot

- Developed a multi-functional personal assistant chatbot that provides weather updates, motivational quotes, jokes, and mood-based movie recommendations through a single platform.
- Integrated external APIs to fetch real-time weather data and dynamic content, improving responsiveness and overall user engagement.
- Built a multilingual movie recommendation feature supporting multiple languages including Hindi, English, Kannada, Tamil, Telugu, and Malayalam.
- Designed an interactive user-friendly interface using Gradio, enabling seamless navigation and enhanced user experience.
- Tech Stack: Python, Gradio, REST APIs, OpenWeather API, Requests

HACKATHONS / COMPETITIONS

Hack The Future (HTF) Hackathon, SJEC | *Smart Electricity Meter*

- Participated in the Hack The Future (HTF) hackathon at SJEC and developed an innovative Smart Electricity Meter solution focused on improving energy monitoring and consumption efficiency.
- Secured a position among the Top 10 teams nationally in the Open Innovation theme by presenting a feasible and impactful solution addressing real-world energy management challenges.
- Designed a smart system for real-time electricity usage tracking, enabling users to monitor power consumption and make informed energy-saving decisions.
- Collaborated effectively in a fast-paced team environment, contributing to ideation, rapid prototyping, solution development, and final project presentation within strict hackathon timelines.
- Tech Stack: IoT, Embedded Systems, Sensors, Real-time Monitoring, Prototyping

TECHNICAL SKILLS

Programming Languages: C, Java, Python, SQL, R, Go, HTML, CSS, Java Script

Other: MySQL, MongoDB, Computer Aided Engineering Drawing, Mobile Application Development, MS Word, MS Excel

Tools: Git, Github, LaTeX, VS Code

SOFT SKILLS

Leadership quality, Public speaking, Team and time management, Consistency, Communication skills, Critical thinking, Problem solving, Presentation skills, Active listener

LANGUAGES

English, Hindi, Kannada, Konkani, Tulu

HOBBIES

Reading, Singing, Dancing, Badminton, Chess
